SUMMARY

Computer Science & Statistics graduate from BINUS (August 2026), fresh off a one-year Data Analyst internship at Indonesia Eximbank. Statistics first: the thesis applied panel-data econometrics in R (Fixed Effect Model with robust standard errors) to Premier League transfer values and shipped the model as an R Shiny app. Hands-on with Excel and Tableau, with R, SQL, and Python for analysis. Most useful where analysis has to become something other people can act on, from Tableau dashboards to small web apps built through AI-assisted development.

EDUCATION

Bina Nusantara University

Bachelor of Computer Science & Statistics

West Jakarta, DKI Jakarta

Graduated: August 2026

- **Relevant Coursework:** Data Analysis, Multivariate Statistics, Survey & Sampling Methods, Machine Learning, Deep Learning (TensorFlow, Keras), Text & Data Mining, Software Engineering, Algorithm & Programming (C), Data Structures, Object-Oriented Programming (Java), Web Programming (Laravel), UI/UX.

WORK EXPERIENCE

Indonesia Eximbank (Lembaga Pembiayaan Ekspor Indonesia)

Data Analyst Intern

South Jakarta, DKI Jakarta

March 2025 - February 2026

- Fulfilled Leads Requests from other divisions: Excel export profiles (buyers, three-year export growth, HS-code breakdowns) into PowerPoint decks for 1,000+ prospective debtor companies.
- Wrote market studies (Kajian) on requested HS codes, processing trade data into chart packs (world and Indonesia exports, top exporters, destination growth) and researching the drivers behind each movement.
- Built interactive Tableau dashboards that auto-generated the charts for those economic reports, removing manual reporting work.
- Scraped Indonesia's export-import data from the BPS portal into Excel pivot tables (tens of millions of rows), so chart data no longer had to be downloaded by hand.
- Cleaned and validated the bank's nationwide company database, the data used to screen prospective debtors, so the numbers were reliable before management acted on them.
- Designed a Figma prototype for the division's internal data platform.

Nusatalent

UI/UX Designer Intern

West Jakarta, DKI Jakarta

August 2023

- Turned business requirements for the platform's "Events" section into user flows, wireframes, and high-fidelity Figma mockups within a one-month design sprint.

RESEARCH & ACADEMIC PROJECTS

Undergraduate Thesis: What Drives EPL Player Market Value?

Individual research, BINUS University

R, R Shiny

2026

- Built an unbalanced panel of 579 player-season observations (attacking players at all 20 clubs, 2022/23 to 2024/25) from Transfermarkt, adding home-grown status from the Football Manager database.
- Compared pooled, random-effect, and fixed-effect models (Chow and Hausman tests chose fixed effects), then used HC1 robust standard errors after Breusch-Pagan flagged heteroskedasticity.
- Within-player gains in goals, assists, and minutes, plus European football and a new transfer, raised market value, while age followed an inverted U peaking at around 26.
- Shipped the final model as an R Shiny app that splits each valuation into performance versus status components and writes a plain-language summary for non-statistical users.

Health Services and Socioeconomic Conditions in Indonesia

Canonical Correlation

Multivariate Statistics course, team of 3

- Co-authored an IEEE-format paper linking health-service and socioeconomic indicators across 34 provinces (BPS 2023); two of three canonical functions were significant, led by per-capita expenditure.

Cancer Literature Classification: SVC vs LSTM vs BERT

Python, NLP

Research paper, team of 3 students with two faculty co-authors

- Co-authored a comparison of three models on 7,569 biomedical papers (lung, colon, thyroid): LSTM reached 98% test accuracy, while the far heavier BERT scored 87%, barely above SVC at 86%.

Serenity: Mental Health Education & Consultation Platform

System Design

Software Engineering course, team of 5

- Gathered user needs with a 5-point Likert questionnaire, then wrote the functional requirements and wireframes (mental health tests, articles, webinars, psychologist booking) following the Waterfall model.

WEB PROJECTS (AI-ASSISTED DEVELOPMENT)

ceritabel: In-Browser Statistical Analysis

Next.js, TypeScript, Vitest

ceritabel.vercel.app

- Runs a full statistical workflow (EDA, hypothesis tests, OLS with classical-assumption checks, panel models, time series) in the browser, with ~80 unit tests and p-values verified against R.
- Adds a grounded LLM layer (Gemini/Groq) that explains results in plain language and exports reproducible Python (pandas/statsmodels) and R code.

xEleven: Premier League Analytics

Next.js, Recharts

epl-xeleven.vercel.app

- Season-management dashboard with nine interactive tools (standings, scouting, title-race charts, Manager Mode) over ten seasons of Premier League data.

Bakery Kita: E-Commerce Ordering System

Next.js, Supabase, Midtrans

bakery-kita.vercel.app

- Ordering flow from catalog to QRIS checkout via Midtrans (sandbox), on a PostgreSQL schema with Row-Level Security, role-gated admin dashboard, server-side price validation, and signed payment webhooks.

More: an idle game, a scroll-driven data story, and a real-time 3D scene at josephirawan.vercel.app.

TECHNICAL SKILLS

Data & Analysis: Excel (pivot tables), Tableau, SQL, Python, R

Statistics: regression, panel data (fixed/random effects, robust standard errors), hypothesis testing, EDA

Systems & Design: requirements gathering, Figma prototyping, relational schema design (PostgreSQL)

Tools & Cloud: Git/GitHub, AWS (Certified Cloud Practitioner), LLM API integration (Gemini, Groq)

LEADERSHIP & ACTIVITIES

Statistics Student Association (HIMSTAT), BINUS University

West Jakarta, DKI Jakarta

Human Resource & Development Staff

March 2022 - March 2024

- Chief Committee for HIMSTAT Gathering 2022 & 2023, and MC for flagship events including Statistical Project for Smart Students and the Shopee company visit.

First Year Program, BINUS University

West Jakarta, DKI Jakarta

Freshmen Partner

August 2022 - July 2023

- Mentored first-year students through a 5-day orientation program and their first year of college.

CERTIFICATIONS & ADDITIONAL

Certifications: AWS Certified Cloud Practitioner (2024, valid through 2027); Progate Python and JavaScript Fundamentals.

Languages: Bahasa Indonesia (native), Javanese (fluent), English (professional working proficiency).

Soft Skills: Public Speaking, Communication, Teamwork, Adaptability, Analytical Thinking, Leadership.
