SUMMARY

Computer Science & Statistics student at BINUS (graduating August 2026) who builds full-stack web apps that turn data into decisions. Data Analyst intern at Indonesia Eximbank; shipped three production web apps spanning e-commerce, statistical analysis, and sports analytics. Comfortable across the stack, from PostgreSQL and APIs to React/Next.js interfaces, with a statistics background that goes beyond dashboards.

EDUCATION

Bina Nusantara University

Bachelor of Computer Science & Statistics

West Jakarta, DKI Jakarta

Expected Graduation: August 2026

- **Relevant Coursework:** Data Analysis, Machine Learning, Artificial Intelligence, Software Engineering, Web Programming, Application Programming, Operating Systems, UI/UX.

WORK EXPERIENCE

Indonesia Eximbank (Lembaga Pembiayaan Ekspor Indonesia)

Data Analyst Intern

South Jakarta, DKI Jakarta

March 2025 - February 2026

- Authored market-research reports (Kajian) on export commodities, analyzing Indonesian export trends, market fluctuations, and macroeconomic drivers to deliver strategic insights.
- Automated the leads-generation workflow to map, identify, and distribute 1,000+ prospective debtor companies, optimizing market targeting for relevant business units.
- Engineered interactive Tableau dashboards that automated data visualization for economic reports, drastically accelerating reporting and eliminating manual work.
- Built a web-scraping pipeline to extract macroeconomic data from the Statistics Indonesia (BPS) portal, integrating it into dynamic Excel pivot tables to streamline analysis.
- Performed rigorous data cleaning and validation across a large-scale company database to ensure accuracy and integrity ahead of management's strategic decisions.
- Designed an interactive prototype for an internal platform in Figma, focused on an intuitive UI and seamless UX for internal stakeholders.

Nusatalent

UI/UX Designer Intern

West Jakarta, DKI Jakarta

August 2023

- Designed and prototyped the platform's "Events" section for intuitive event discovery.
- Produced end-to-end design deliverables (user flows, wireframes, and high-fidelity mockups) in Figma.
- Executed a one-month design sprint, translating business requirements into a development-ready product.

PROJECTS

ceritabel: AI-Assisted Statistical Analysis

ceritabel.vercel.app

Next.js, TypeScript, Vitest

- Built a privacy-first web app that runs a full statistical workflow (EDA, hypothesis tests, OLS regression with classical-assumption checks, panel models, and time-series analysis) entirely in the browser.
- Hand-implemented the inference engine (exact p-values, confidence intervals, effect sizes), backed by ~80 unit tests with its p-values verified against R.
- Integrated a grounded LLM layer (Gemini/Groq) that explains results in plain language and exports reproducible Python (pandas/statsmodels) and R code.

Bakery Kita: Full-Stack E-Commerce

bakery-kita.vercel.app

Next.js, Supabase, Midtrans

- Developed an end-to-end ordering platform: catalog, cart, checkout, and live QRIS payments via Midtrans.

- Designed a PostgreSQL schema with Row-Level Security, email/Google authentication, customer order history, and a role-gated admin dashboard.
- Implemented server-side price validation and SHA-512 webhook signature verification for payment integrity.

xEleven: Premier League Analytics

Next.js, Recharts

epl-xeleven.vercel.app

- Built a season-management dashboard with nine interactive tools (standings, scouting, title-race charts, Manager Mode) over ten seasons of Premier League data.

After hours: Real-Time 3D Web Scene

Three.js, react-three-fiber, GLSL

afterhours-3d.vercel.app

- Built an interactive real-time 3D scene (a coder on a floating island) with react-three-fiber and hand-written GLSL shaders, featuring a day/night toggle and thousands of grass blades rendered with GPU instancing.

TECHNICAL SKILLS

Languages: TypeScript / JavaScript, Python, R, SQL

Web & Frameworks: Next.js, React, Tailwind CSS, Node.js

Data & Statistics: Supabase / PostgreSQL, Tableau, Excel; regression, hypothesis testing, panel data, EDA

Tools & Cloud: Git/GitHub, Figma, AWS (Certified Cloud Practitioner)

LEADERSHIP & ACTIVITIES

Statistics Student Association (HIMSTAT), BINUS University

West Jakarta, DKI Jakarta

Human Resource & Development Staff

March 2022 - March 2024

- Organized and emceed (MC) flagship HIMSTAT events: Statistical Project for Smart Students, anniversary celebrations, the Shopee company visit, and member gatherings.
- Served as Chief Committee for HIMSTAT Gathering 2022 & 2023, leading planning and execution end to end.

First Year Program, BINUS University

West Jakarta, DKI Jakarta

Freshmen Partner

August 2022 - July 2023

- Mentored and accompanied first-year students through a 5-day Orientation & Transition Program and their first year of college, introducing them to university life and organizations.

CERTIFICATIONS & ADDITIONAL

Certifications: AWS Certified Cloud Practitioner (2024, valid through 2027); Progate Python Fundamental; Progate JavaScript Fundamental.

Languages: Bahasa Indonesia (native), Javanese (fluent), English (professional working proficiency).

Soft Skills: Public Speaking, Communication, Teamwork, Adaptability, Analytical Thinking, Creativity, Leadership.
